

FACT: One in 6 Connecticut high school students reported being with **4 or more** sex partners.

FACT: Most new cases of **Sexually Transmitted Diseases** (chlamydia, gonorrhea, etc.) are among **youth**. STDs increase the chance of getting HIV.

FACT: Experimenting with alcohol and drugs can lead to poor decision-making that puts **youth at-risk** for HIV.

**Please talk to your children
about sex, drugs and disease.
Their health depends on it.
They will learn best from you.**
